

Facts:

Project : Alstom - EL JADIDA, MOROCCO

Client: Alstom Group , France.

Product: Spiderline 2 , Self Retractable Lanyards and Harnesses.

Overview : Alstom is a large French multinational conglomerate which holds interests in the power and transport markets. The group is operating in Morocco , involved in one of the highest project which is to set up the TGV (high speed train) from Tanger (North) to Marrakesh (South)

Situation: As they are fighting the safety risks daily they are not allowing their employees to work for the maintenance on their train with the risk of fall.

Solution: Froment equipped the workshop with a full fall protection solution. We installed a lifeline SPIDERLINE 2 and provide fall equipments Harnesses (HA046) Lanyards (AN218CDD), and self retractable lanyard (AN152F) This solution permit them to move safely on top of the train in a 50m distance . We have eliminated the factor 2 with factor 0. As of now, they can be more efficient at work, comfortable and forgetting risk of fall.
