

## Facts

Project: Ocean Park Hong-Kong

Client: Asia Pacific Industrial Safety Equipment

Situation: The Park has to be secured in order to allow the workers to do the maintenance and inspection of each part of the attraction park.

Solution: Froment provided a complete fall protection solution which includes Spiderline II (horizontal lifeline), lanyard and harnesses.

We installed the lifeline on the attraction park, to allow them to work safely. The fall protection system would provide a complete safe solution for maintenance employees.
